

Conax CAS7 Module

Your little Conax helper

This Conditional Access Module, together with an authorized smartcard, gives access to Conax encrypted services. It can be used for TV sets and receivers with CI interface. Insert the CAM with an authorized smartcard into your DVB-C TV or receiver and you are ready to watch TV programmes.

- Decoding of MPEG-4, SD and HDTV programmes together with an authorized smartcard
- CONAX™ Conditional Access System embedded
- Plug & Play technology for Digital TVs (iDTV) and receivers
- Dual descrambling: watch one TV programme while recording another one
- Teletext support
- Space-saving and operation with one remote control

Stream type:

MPEG-4, SD and HD
Audio types:
Dolby, etc

Standards:

DVB Common Interface standard and PCMCIA ISO/IEC EN50221 compliant
Compliant with smart card ISO 7816-3 (T=0)
RoHS directive 2002/95/EC compliant

Memory:

eDRAM: 16 Mbits
Serial Flash: 16 Mbits

Connectors

Type: PCMCIA Type II

General data:

Weight: 46 g
Power supply: 5 V from DVB-CI host
