

## Powerline 500 Kit

Internet everywhere from any power socket!

The Powerline 500 Kit which includes 2 Powerline 500 adapters creates in an extremely simple way a high-speed home network using your home's existing electrical wiring at speeds up to 500 Mbit/s.

No new wire required! Connect computers, consumer electronic and network-compatible devices to the Internet in any room and any floor of your home by simply using a power outlet.

You just have to connect one Powerline 500 adapter to your internet modem via an Ethernet port and your Internet connection becomes immediately available from any power socket by using the second Powerline 500 adapter in the room of your choice.

No power outlet goes to waste because each Powerline 500 adapter is equipped with an extra noise filtered power socket.
